

SOFTWARE REQUIREMENTS SPECIFICATION

Employee Leave, Approval & Performance Management Portal

Document Item	Details
Project	Employee Leave, Approval & Performance Management Portal
Document	Software Requirements Specification (SRS)
Project Manager	Anshuman
Business Analyst	Rajneesh
Scrum Master	Om
Solution Architect	Prince
Technical Lead	Shlok
Delivery	Three sprints
Platform	Microsoft Azure
Authentication	Microsoft Entra ID (formerly Azure Active Directory)

1. Introduction

1.1 Purpose

This SRS defines the functional and non-functional requirements for the Employee Leave, Approval & Performance Management Portal. It translates the approved BRD and final Statement of Work into a structured requirements baseline for architecture, development, testing, UAT and delivery.

1.2 Product Scope

The product is a responsive web application intended to replace the organization's email- and spreadsheet-based leave process with a centralized workflow. Employees submit leave requests, reporting managers review them, and HR provides final approval. The portal also provides leave balances, manager goals and feedback, HR dashboards and notifications.

1.3 Scope Authority

The approved BRD defines business need and rationale, while the final SOW defines committed delivery scope. This SRS organizes those approved requirements for software execution. Requirements not expressly included are not assumed to be part of the current delivery.

2. Users and Access

User	Capabilities
Employee	Own profile/context, leave balance, leave submission/tracking, own goals and feedback.
Reporting Manager	Manager capabilities within Employee login; direct-report leave review/approval, leave history, goals and feedback.
HR	Organization-wide leave, balances, approvals, statistics, goals and feedback; authorized balance adjustments.

Manager is a capability of an employee mapped as a reporting manager, rather than necessarily a separate login type.

3. Functional Requirements

3.1 Authentication & Access

ID	Requirement
FR-AUTH-01	Authenticate users using Microsoft Entra ID / Azure AD credentials.
FR-AUTH-03	Enable manager capabilities for employees mapped as reporting managers.
FR-AUTH-04	Enforce role/permission-based authorization. [Employee, Manager, HR]
FR-AUTH-05	Prevent unauthorized cross-employee access.

3.2 Employee Portal

ID	Requirement
FR-EMP-01	Employees shall view their profile/context.
FR-EMP-02	Employees shall view their leave balance.
FR-EMP-03	Employees shall submit leave requests.
FR-EMP-04	Employees shall view status/history of submitted requests.
FR-EMP-05	Employees shall view their own goals/objectives.
FR-EMP-06	Employees shall view their own feedback history.

3.3 Leave Management

ID	Requirement
FR-LEAVE-01	Capture authenticated employee identity for a leave request.
FR-LEAVE-02	Require leave type.
FR-LEAVE-03	Require start and end dates.
FR-LEAVE-04	Require a reason.
FR-LEAVE-05	Calculate leave days using configured weekends/holidays.
FR-LEAVE-06	Allow an optional supporting PDF/IMG attachment.
FR-LEAVE-07	Maintain the agreed leave-request status lifecycle.
FR-LEAVE-08	Allow optional manager and HR comments.

3.4 Manager Capabilities

ID	Requirement
FR-MGR-01	View pending approvals for direct reports.
FR-MGR-02	View request details and supporting attachments for direct reports.
FR-MGR-03	Approve a direct-report leave request.
FR-MGR-04	Reject a direct-report leave request.
FR-MGR-05	Provide an optional decision comment.
FR-MGR-06	View direct-report leave history.
FR-MGR-07	Create/edit goals for direct reports.
FR-MGR-08	Record dated free-text feedback for direct reports.

3.5 HR Management & Dashboard

ID	Requirement
FR-HR-01	View organization-wide employee information within scope.
FR-HR-02	View employees currently on leave.
FR-HR-03	View pending requests by approval stage.
FR-HR-04	Perform final leave approval/rejection.
FR-HR-05	View employee leave balances.
FR-HR-06	View manager-wise approval/rejection statistics.
FR-HR-07	View department-wise leave statistics.
FR-HR-08	Search/filter employee, manager, department, date and status information where defined.
FR-HR-09	View organization-wide goals and feedback.

3.6 Leave Balance

ID	Requirement
FR-BAL-01	Maintain allocated, used and remaining leave by employee and leave type.
FR-BAL-02	Do not deduct balance at submission or manager approval.
FR-BAL-03	Deduct balance only after HR final approval.
FR-BAL-04	Support controlled balance adjustments by authorized HR users.

3.7 Performance & Feedback

ID	Requirement
FR-PERF-01	Managers shall create goals/objectives for direct reports.
FR-PERF-02	Goals shall support title, description, target date and status.
FR-PERF-03	Managers shall edit goals/objectives.
FR-PERF-04	Managers shall record dated free-text feedback.
FR-PERF-05	Employees shall view their own goals and feedback.
FR-PERF-06	HR shall view organization-wide goals and feedback within scope.

3.8 Notifications

ID	Requirement
FR-NOTIF-01	Notify the reporting manager when a leave request is submitted.
FR-NOTIF-02	Notify HR when a manager approves a leave request.
FR-NOTIF-03	Notify the employee when a manager rejects a request.
FR-NOTIF-04	Notify the employee when HR approves or rejects a request.
FR-NOTIF-05	Notify the employee when new goal/feedback information is created, as defined.
FR-NOTIF-06	Finalize the notification mechanism during technical design.

4. Leave Workflow

The core workflow is Employee → Reporting Manager → HR.

- Employee submits leave → Pending Manager Approval.
- Manager reviews and approves or rejects.
- Manager rejection → Rejected / Closed.
- Manager approval → Pending HR Approval.
- HR performs final approval or rejection.
- HR approval → Approved and applicable leave balance is updated.
- HR rejection → Rejected / Closed.

4.1 Business Rules

- Only authenticated users may use protected functionality.
- Manager action occurs before HR final approval.
- A manager cannot approve their own leave.
- Leave balance is deducted only after HR approval.
- Manager/direct-report access must follow authorization mapping.

5. Data Requirements

Data Area	Purpose
Employee	Identity, organization context and manager relationship.
Leave Request	Leave type, dates, reason, calculated days, attachment reference and current status.
Approval	Manager/HR decision and optional comments.
Leave Balance	Allocated, used and remaining balance by employee and leave type.
Goal	Goal title, description, target date and status.
Feedback	Dated free-text feedback for an employee.
Notification	Workflow notification information as determined during technical design.

6. External Interfaces & Storage

Service / Interface	Requirement
Microsoft Entra ID	Authentication / SSO.
Azure SQL Database	Relational application data storage.
Azure Blob Storage	Supporting PDF/image attachments.
Notification Mechanism	Mail
Microsoft Azure	Hosting of the agreed project solution.

7. Non-Functional Requirements

ID	Requirement
NFR-01	Responsive desktop and mobile-browser experience.
NFR-02	Acceptable interactive performance for expected academic-project usage.
NFR-03	Maintainable solution within agreed project scope.
NFR-04	HTTPS/TLS for protected communication.
NFR-05	Server-side authorization.
NFR-06	Attachment validation according to approved types and size limits.
NFR-07	Secure handling of secrets; Azure Key Vault is the proposed direction.
NFR-08	Deployable and demonstrable in the available Azure academic/free-tier environment.
NFR-09	No enterprise-scale SLA, HA, DR or capacity guarantee is implied.

8. Proposed Technical Direction

Layer	Technology / Service
Frontend	React + JavaScript
Styling	Tailwind CSS
Backend	Node.js / ExpressJS
API	REST
Database	Azure SQL Database
ORM	Prisma
Authentication	Microsoft Entra ID
File Storage	Azure Blob Storage
Secrets	Azure Key Vault
Hosting	Azure App Service
Monitoring	Azure Monitor + Application Insights
Version Control	Git + GitHub
CI/CD	GitHub Actions
API Testing	Postman

This is a proposed technical direction for planning and may subject to change.

9. Out of Scope

- Payroll and salary processing.
- Recruitment / applicant tracking.
- Biometric attendance integration.
- Formal performance appraisal, annual calibration, rating or scoring workflows.
- Multi-level, skip-level or department-head approval beyond Manager → HR.
- Native Android or iOS applications.
- Additional user groups not defined in the approved BRD.
- Direct mailbox/email-system integration.
- Production-scale Azure architecture, high-availability/SLA commitments and enterprise operations beyond academic constraints.
- Advanced analytics and custom reporting beyond approved dashboards and filters.

10. Delivery Milestones

Milestone	Date	Goal / Output
BRD Sign-off	3 Sep 2026	Approved business scope
Sprint 1	5–7 Sep 2026	HLD / architecture decision set
Sprint 1 Demo	8 Sep 2026	Working increment + feedback
Architecture Finalized	8 Sep 2026	Foundation & core workflow
Sprint 2	8–14 Sep 2026	Approval & HR capabilities
Sprint 2 Demo	15 Sep 2026	Working increment + feedback
Sprint 3	15–24 Sep 2026	Performance, hardening & deployment
Final Demo	24 Sep 2026	End-to-end demonstration
UAT & Handover	25 Sep 2026	Business validation & closure
Project Closure	26 Sep 2026	Formal completion

11. Acceptance Criteria Summary

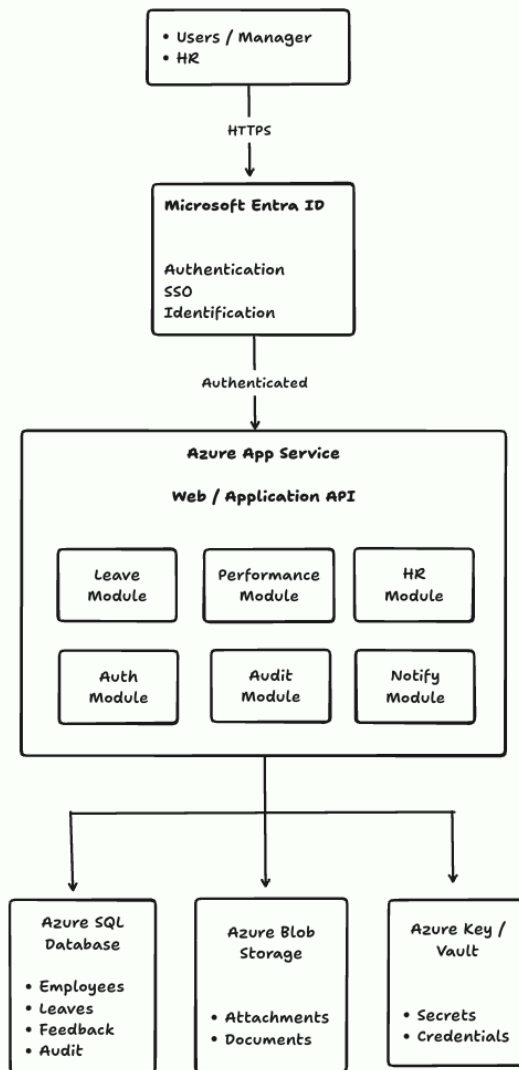

- Employees authenticate through Microsoft Entra ID and access only permitted functionality.
- Employees submit valid leave requests with optional accepted supporting files.
- Requests route to the correct reporting manager and show agreed status.
- Managers approve/reject direct-report requests with optional comments.
- Manager-approved requests move to HR; manager-rejected requests close as rejected.
- HR approval changes the request to Approved and updates the leave balance.
- Employees view balances and request status/history.
- HR views organization-wide leave information, balances and agreed statistics.
- Managers manage goals and feedback for direct reports; employees view their own information; HR views organization-wide information.
- Unauthorized cross-employee access is prevented through server-side authorization.
- The agreed solution is deployed to and demonstrable in Azure.

12. Assumptions & Constraints

- The organization uses Microsoft Entra ID / Azure AD and can provide required access.
- Manager mapping is reliable or HR provides a maintained mapping list.
- HR confirms leave types, annual allocations, attachment types and maximum file size.
- Client provides timely feedback and participates in UAT.
- Client provides Azure subscription/resources and required access.
- Notification mechanism is confirmed during technical design.
- One-month academic time-box and three-sprint cadence.
- Azure free-tier/academic resources may constrain services, quotas and usage.
- Native mobile applications are excluded.

14. Sign-off

Role	Name	Sign-off
Project Manager	Anshuman	
Business Analyst	Rajneesh	
Scrum Master	Om	
Solution Architect	Prince	
Technical Lead	Shlok	
Client / Business Owner / HR Representative	Santosh	

End of SRS
