144. Hotstar OTT Platform

Industry: Streaming Media

Problem Statement:

Disney+ Hotstar needs a high-performance Flutter app for live sports streaming, movies, TV shows, and original content with adaptive bitrate streaming, offline downloads, and multi-language support for Indian audiences across network conditions.

Technical Implementation:

- Video player with adaptive bitrate (360p to 4K)
- Live streaming with chat and real-time reactions
- Download manager for offline viewing (expiry management)
- Multi-language audio tracks and subtitles
- Parental controls with PIN protection
- Continue watching across devices

Product Building:

Display content rating, duration, release year, cast/crew, similar recommendations, and user reviews with spoiler tags.

Pricing Strategy:

- Free tier: Ads supported, limited content
- Mobile subscription: ₹499/year (mobile only)
- Super subscription: ₹899/year (mobile + TV)
- Premium subscription: ₹1,499/year (4K, family sharing)

Product Features to be Visible:

- Video player with adaptive bitrate (360p to 4K)
- Live streaming with chat and real-time reactions
- Download manager with expiry management
- Multi-language audio tracks and subtitles
- Parental controls with PIN protection
- Continue watching across devices
- Content rating with age suitability
- Duration and release year display
